Bariatric Walker

This model is designed for the larger person, with a wider frame and greater weight capacity than a standard Walker. It has the cable brake system which operates by applying a light squeeze on the brake lever to temporarily stop, or by pushing down on the brake lever to lock the brakes before sitting on the comfortable padded seat. Supplied with a detachable backrest, the frame folds up to make it convenient for transport and storage. The steel frame weighs 12.10 kg and can support someone up to 181kg in weight.

Features

- Fold up frame for ease of transport and storage
- Steel construction with powder coated finish
- Detachable height-adjustable handles
- Foam covered detachable backrest
- Wire shopping basket sits under seat
